1600-189 Lisboa
Portugal

8.02.2019

Dear Prof. Pinto !

I am genius, and you can imagine that I have a lot to do, what only I and nobody else can do. Furthermore, you can imagine that my doing needs beneficial living conditions to perform it effectively. Unfortunately, due to the lack of such living conditions in Germany, where I am living since 1993, my work is permanently hindered and my wellbeing is threatened. Because of your education, your academic position and the [presidency](#) I assume that you is able to understand my needs and also capable to fulfill my wishes in the above mentioned sense, i.e. living free of proscription, professional ban, defamation, maltreatment and other cruelties which I experienced in Nazi Germany.

My needs include a dwelling which meets my specific necessities; healthy surroundings; access to information, health care, scientific and cultural facilities; technical and other assistance if I apply for such assistance.

I want to come to Portugal as soon as possible because Germans have made my life here simply impossible and I reasonable despise this country and its barbarous, mentally retarded and psychopathic inhabitants.

Please note that in case if my expectations will not be fulfilled, your capacity of discernment and to act will be questioned, and you will never get any academic position after ending your presidency.

Dr. Andrej Poleev
